

DEEKSHA

📍 Mangalore ✉ deekshakotian928@gmail.com 📞 9538931087 in Deeksha 🌐 Deeksha

Profile

Passionate Computer Science and Business Systems undergraduate with strong skills in Java, SQL, and problem-solving. Experienced in projects involving cryptography, database management, and software development. Quick learner with excellent communication and teamwork skills, eager to apply technical knowledge in real-world software development and engineering applications.

Education

CANARA ENGINEERING COLLEGE , B.E in CSBS	<i>2022 – Present</i>
CGPA: 8.68	
St. RAYMOND'S PRE-UNIVERSITY COLLEGE, PCMC	<i>2020 - 2022</i>
Percentage: 86.33	
ROSA MYSTICA ENGLISH MEDIUM HIGH SCHOOL	<i>2019 - 2020</i>
Percentage: 90.72	

Projects

FinVault-Database-Driven Banking System	<i>2023</i>
- Developed a banking system allowing users to register, log in, and manage accounts. - Integrated Java with MySQL using JDBC for account creation, deposit, withdrawal, and balance checks. - Designed a dynamic JSP interface for seamless frontend-backend interaction.	
KINEXUS-Smart Contact Manager	<i>2024</i>
- Built a web-based contact management system with secure OAuth login and user-friendly interface. - Used Spring Boot for backend development and Thymeleaf for dynamic content rendering.	
CHAT APPLICATION	<i>2024</i>
- Developed a real-time chat application with secure user authentication. - Used Flutter for cross-platform mobile app development and Firebase for backend services.	
SAFEHOOD	<i>2025</i>
- SafeHood is a smart community and safety app for apartment complexes, enabling real-time alerts, emergency support, and local services. - Developed using Flutter for app development and Firebase for backend, database, and authentication.	
HOUSE PRICE PREDICTION SYSTEM	<i>2025</i>
- Built a predictive machine learning model to estimate real estate prices in Bengaluru. - Developed using Python and trained on Kaggle dataset (Bengaluru-house-data.csv).	
Cryptography Based Online Voting System for College Election	<i>2025</i>
- Designed a secure online voting system ensuring privacy and integrity of votes using cryptography. - Developed using C++ with HElib (BGV scheme) for encryption, React for frontend, and Flask for backend integration.	

Technical Skills

Programming Languages: Java,C

Web Development and Databases: HTML, CSS, SQL, MongoDB

Frameworks and Tools: Git, GitHub, Flutter

Soft Skills: Leadership, Communication, Active Listening, Teamwork and Collaboration,Critical Thinking

Certifications And Achievements

- HackNocturne 2025 – Technical Hackathon, Sir M. Visvesvaraya Institute of Technology, Bengaluru.
- Workshop: Mobile App Development using Flutter – Canara Engineering College.
- Workshop: Unlocking the Basics of Machine Learning – Canara Engineering College Accolade Tech Solutions.
- NPTEL Certification: Data Science for Engineers.
- Obtained the “Google AI Essentials” certification from Coursera.
- Certification: Frontend Development (HTML, CSS) – Great Learning.
- Certification: Object-Oriented Programming in Java (OOPs) – Great Learning.
